

THE WORLD LEADER IN SPECIALTY COATINGS

## SPC Manufacturing has Relocated to Dayton, Nevada Facility

To Our Valued Customers:

On August 7, 2020, SPC announced plans to relocate their manufacturing from Brantford, Ontario to Dayton, Nevada. The new Dayton, Nevada facility is a state-of-the-art, ISO 9001 certified manufacturing plant and has the ability for greater manufacturing capacities to service our customers' needs.

We want to assure you, that no raw materials and product formulations will be subjected to change and that all applicable coating standards for manufacturing have been tested and meet qualification approvals for: CSA Z245.30, ISO 21809-3, NACE, NSF & AWWA.

Additionally, to further support our customers' needs, SPC will be expanding our warehouse locations across the United States and globally. Our customer service & sales order desk will be enhanced by utilizing specialized departments within our affiliate, Carboline. During this transition, service will not be disrupted and you can expect the same great service you receive now, with additional direct support from the SPC Sales and Technical Service Team. Please find attached direct contact details for SPC Representatives for all order placing and technical support.

If you have any questions or concerns, please contact your SPC Sales Representative or Management as listed below:
